

HOMELITE® 190 CHAIN SAW

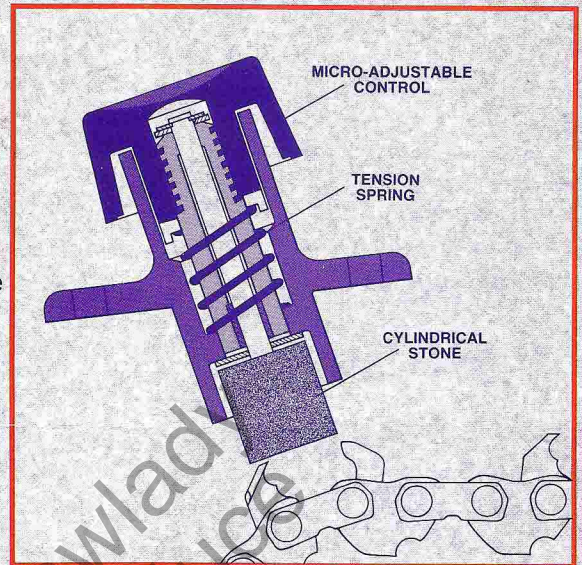

WITH EXCLUSIVE AUTOMATIC CHAIN SHARPENING SYSTEM

The Homelite automatic chain sharpening system produces a long-lasting precision cutting edge at the push of a button. The micro-adjustable control gives you the ability to fine tune the sharpening process. You can sharpen as little or as much as needed, leaving a factory sharp edge every time. What's more, the need to hand file or machine grind the chain is virtually eliminated.

The cylindrical sharpening stone hones the entire cutting surface of the chain while maintaining proper alignment and height. The durable stone rotates as it sharpens, distributing stone wear evenly. This eliminates unwanted grooves found in other systems which result in poor sharpening.

And the chain is unique too. Designed to take and hold a sharp edge, it will last through repeated sharpenings. This means your chain saw will continue to cut as effectively as the day it left the factory.

Homelite's exclusive automatic chain sharpening system has been combined with over fifty years of chain saw experience to produce the Model 190.

- Homelite® automatic chain sharpening system
- Exclusive SAFE-T-TIP® anti-kickback device protects you and your saw
- Deluxe hand guard for added protection
- Rubber-coated handle bar for greater comfort
- Solid state ignition for easy all-weather starting
- Automatic chain oiling extends bar and chain life
- Lightweight (under 10 lbs.) for ease of use and longer operation
- Rugged 1.9 cu. in. (31 cc) engine
- 16" Power Tip® bar for extended bar and chain life and increased performance
- Twin Trigger® control allows saw to match different cutting conditions
