

NEW HOMELITE® CHAIN SAW.

240

Positioned right in the heart of the consumer line.

Loaded with the features your customers want, and powered just right to handle the big jobs, the new 240 chain saw was designed for maximum consumer appeal.

Homelite® 240. Featuring a rugged 2.4 cu. in. engine, this versatile saw can handle most consumer cutting needs. The impressive list of features practically sells the 240 for you. They include: Automatic chain oiling which provides the right amount of oil at the right time for longer bar and chain life; solid state ignition for dependable all weather starts; vibration isolation for more comfortable operation and reduced operator fatigue; light weight for easy handling; 14", 16" and 18" Power Tip® guide bars

which reduce friction and increase cutting speed and power; and the exclusive SAFE-T-TIP® anti-kickback device which protects the operator and the saw.
