

HOMELITE® 245

Built to be tough, the Homelite 245 gasoline chain saw is a lightweight, top performer that easily handles a variety of cutting jobs. Its rugged 39.3cm³ engine makes the 245 ideal for clearing land, rough cutting lumber or topping fence posts. The three-shoe lined clutch has great durability and improves cutting

performance. Vibration isolation and a well-proportioned, easy-to-use grip handle mean more operator comfort, less fatigue. And the noise level is low due to the air intake silencer. Other outstanding features are an easy-to-reach manual chain oiler, Safe-T-Tip® anti-kickback device and solid state ignition.

*TECHNICAL SPECIFICATIONS

| | |
