

## Terry Homelite Happenings

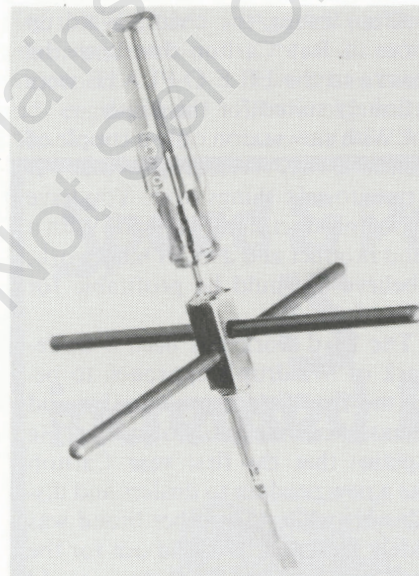

HEADQUARTERS and sales personnel gather for group photograph during recent annual meeting for Homelite-Terry-Textron of Pointe Clare, Quebec. New products . . . including gas-powered string trimmer, electric chain saw line and professional model 750 chain saw . . . were introduced at the meeting. Also attending the Quebec conclave was W.S. Nochisaki, Vice President, Operations, Homelite in the United States.

## Ohio Firm Introduces Torqer Tool

A fascinating, new concept in multi-purpose tools has been developed by the Torqer Tool Co. of Cleveland, Ohio. Called the Torqer, it serves as a socket wrench, screwdriver, tap/reamer wrench, die holder and an Hex Allen wrench.

Torque can be generated by using one or both Torque Bars; by using a ratcheting box wrench, an open end wrench, or an adjustable wrench. It can also be used as a simple one-handed tool.

Available in 3/8" sq. and 1/2" sq. drive sizes, the basic Torqer consists of the master handle, two torque bars and an adapter for standard sockets. A complete line of accessories is available in both fractional and metric sizes for most any use. Flat blade and Phillips screw drivers, hex key drivers, die holders, tap chucks, universals, flex sockets, extensions, adapters, ratchet attachments, spark plug sockets, etc.
