

Homelite Repeats Popular Price-Off Special On 360 Chain Saw

The Homelite Division of Textron Inc., is offering professional loggers, farmers and landowners a \$40 price-off special with each purchase of its 360 chain saw model. The offer, being repeated this year by

popular demand, runs until December 31, 1979. The professional-sized chain saw, reduced from \$344.95 to \$304.95 with 16-inch cutting attachment, is ideal for land clearing, limbing, bucking and firewood cutting. The 360, with an exclusive "fail safe" vibration isolation system, has a powerful 3.5 cubic-inch engine displacement, automatic oiling and capacitor discharge ignition system. The promotion is available from all participating Homelite dealers.

The Quick-Split

This QUICK-SPLIT behemoth quarters 8 foot logs 4 feet in diameter to sizes acceptable to the chipper flumes of the paper com-

panies using it. It is 22 feet in length, weighs just over 9000 pounds and with its tandem suspension follows the log haulers over even the roughest terrain. The telescope ram travels 100 inches of the 112 inch opening and packs a 100-ton wallop. It is designed and built by the manufacturers of the QUICK-SPLIT line of log splitters made for home owners and professional woodsmen — G.E. Mann, Inc., Box 723, Campbellsport, Wi. 53010.
